**Training Approach**

- Remembering Abigail Adams who stated, "Learning is not attained by chance; it must be sought for with ardor and attended to with diligence", we attend to aspect of learning with due diligence and believe in imparting knowledge that plays an important role for continued success of our clients. Therefore, our motto is "Continuity to Success and Knowledge".
- We understand the importance of impacting the thinking behaviors in the processes of learning.
- We recognize the link of the knowledge domains to different categories of cognitive levels highlighted by Bloom’s Taxonomy (latest version) as indicated in Table below:

**Table** *Bloom's Taxonomy*

The Knowledge Dimension	The Cognitive Process Dimension					
	Remember	Understand	Apply	Analyze	Evaluate	Create

### **Advantages Of CONSAK Courses**

- **PMP**<sup>®</sup> (Project Management Professional) - For individuals with a few years of industry experience and looking to further their career as Project/Portfolio manager. Learning good skills of project management are useful in any industry, both in the Technical profession (Engineers, IT, Construction, etc.) and non technical (Services, Banking, etc.). PMP is one of the hottest and most globally recognized certification today and CONSAK training prepares the participants to pass the PMP exam with confidence.
- **CAPM**<sup>®</sup>- (Certified Associate Project Manager) - A PMI<sup>®</sup> certification in project management with global recognition for those who are not having enough work experience to qualify PMP exam criteria. Good for those who are starting their career and would to know of project management and wish to demonstrate their project management knowledge in their work. Later after earning enough experience hours the credential holders of CAPM<sup>®</sup> can qualify to take PMP<sup>®</sup> exam. Anyone with post secondary education (High School) and even with no work experience can do this course.
- **Lean Six Sigma**- A course combining tools of both methodologies. Good for individuals seeking to step into the realms of Lean and Sigma or for those looking to add variety to their skills set for professional growth. No special prerequisites are required to do this training.
- **Lean Management** - Pertains to both enterprise and manufacturing. Training teaches tools and techniques to reduce process wastages and improve efficiency. Lean is famously associated with Toyota Production System and now many companies are employing or are keen to employ Lean techniques. This certification helps in all areas of work to enhance proficiencies and meet customer expectations. No special prerequisites are required to do this training. Participants achieve the Lean Management Certification.
- **Six Sigma Green / Black Belt / Master Black Belt** - Being specific to six sigma domain, Green belt, Black and Master Black Belt certifications represent middle and higher competency levels respectively. There is applicability of these courses in diverse industries including services, manufacturing and transactional etc. Participants receive the relevant certification while providing a fillip to one's management skills. Some knowledge of statistics is useful for these courses.
